ARCADE PACK I

This Program contains three exciting M/C games.

GAME 1: SHOOTOUT:

You are the sherriff in a town full of bad guys. You must clean up the town. The baddies turn up at random with a number 0-9 beside them. You must press the corresponding number on the computer to shoot them. Be careful not to miss as some odd things happen. Very colourful and very fast, amazing graphics. Speed levels 1-9.

GAME 2: ASTRO: 72

Avoid the astroieds and many other different objects flying at you from all directions. Very addictive game. Again good graphics and speed. Instructions in game — 1-9 speed levels. 1-9 game levels.

GAME 3: GLOOPA: 143

Choose your maze and paint the walls avoiding the Guards. Extremely fast, colourful, hours of fun.

Look out for games pack II and III over the next few months. They contain more exciting, fast, and colourful M/C games.

LOADING:

The games are on tape in the above order and each are loaded in the normal way.

Type Load. CR and start the cassette. Stop when loaded.
